

The Orchards Primary Academy

Newsletter

13th July 2020 / Year 2

Dear Children and Families,

Hope you are all well. The final week of the term is upon us and I can't quite believe the way this year has panned out for all of us. Months ago I was convinced that we would all be back together before the end of the school year, yet here I am writing my final newsletter to you and I haven't seen you since March when we all had to go to our houses.

Now, four months on we have missed the entire summer term with one another. However, thanks to the regular phone calls and emails, I have been able to keep in contact with you and will pay you a visit when we head back to school in September when you start the new year with Miss Gindhay.

We are now heading into our final week of learning and will work from Week 11. However, for those of you that would like to continue with some form of schooling, as well as posting this week's Db tasks, I shall then post a mammoth set of tasks for you at the end of the week, to keep your brain ticking over the summer holidays. There will be no points for the summer tasks but for anyone who completes the full set there will definitely be something for you when I see you in September

Looking forward to seeing you all in September – have a lovely holiday,

Mrs Hughes

Maths

Multiplication and Division

- To apply knowledge of multiplication tables.
- To recognise the inverse relationships between multiplication and division.
- To apply knowledge of the 2x tables.
- To create bar models for X and division.
